

23CSE399 Project Phase 1 – Components and Rubrics

Case 1: Research Project

Guide Review 1: Research Project [20 Marks]

Component	Rubrics		
<i>Originality of the Work</i> (4 Marks)	Existing idea or plagiarism in submission – 0	Extending an existing work, no plagiarism - 3	Fully novel idea, no plagiarism - 4
<i>Motivation (User Survey / Problem Relevance)</i> (6 Marks)	Not enough survey done to justify the research direction - 0	More survey needed but the research direction is justified - 3	Extensive survey done and research direction is justified - 6
<i>Domain Knowledge & Understanding of Technology</i> (8 Marks)	Lacks fundamental knowledge in the domain - 0	Fundamentals are satisfactory, but needs further study – 4 marks	Clearly demonstrated technical knowledge (algorithms/models etc.) in the domain - 8
<i>Meeting Regularity & Involvement</i> (2 Marks)	Is not regular in meeting – 0	Meets regularly but inactive in discussions – 1	Meets regularly and active in discussions - 2

Panel Review 1: Research Project [30 marks]

Component	Rubrics		
<i>Originality of Use Case</i> (4 Marks)	Existing idea or plagiarism in submission – 0	Extending an existing work, no plagiarism - 3	Fully novel idea, no plagiarism - 4
<i>Literature Review & Benchmarking</i> (6 Marks)	Not enough survey done to justify the research direction - 0	More survey needed but the research direction is justified - 3	Extensive survey done and research direction is justified - 6
<i>Technical Knowledge (Application Workflow, Tools, Protocols)</i> (15 Marks)	Lacks fundamental knowledge in the domain - 0	Fundamentals are satisfactory, but needs further study – 4 marks	Clearly demonstrated technical knowledge (algorithms/models etc.) in the domain - 8
<i>Report</i> (5 Marks)	The report is very generic with no hint on the research direction – 0	The report is generic and doesn't convey the research direction - 3	The report (1 page) is well written - 5

Case 2: Use case/Application based

Guide Review 1: Application based [20 Marks]

Component	Rubrics		
<i>Originality of the Work</i> (4 Marks)	Existing idea – 0	Existing idea but modified for a new use case - 3	Strongly application-specific, unique context - 4
<i>Motivation (User Survey / Problem Relevance)</i> (6 Marks)	No proper user study; motivation not justified - 0	Some survey done; motivation partially justified - 3	Clear user survey or stakeholder input; motivation strongly justified- 6
<i>Domain Knowledge & Understanding of Technology</i> (8 Marks)	Lacks understanding of required tools/tech (IoT stack, sensors, mobile frameworks) - 0	Fundamentals satisfactory but needs more study (microcontrollers, APIs, protocols)– 4 marks	Clear technical understanding demonstrated (end-to-end data flow, key components, protocols) - 8
<i>Meeting Regularity & Involvement</i> (2 Marks)	Is not regular in meeting – 0	Meets regularly but inactive in discussions – 1	Meets regularly and active in discussions - 2

Panel Review 1: Application based [30 marks]

Component	Rubrics		
<i>Originality of Use Case</i> (4 Marks)	Copied or generic idea – 0	Adapted or improved version of an existing application - 3	Novel use case with clear real-world applicability - 4
<i>Literature Review & Benchmarking</i> (6 Marks)	Insufficient review; related works missing - 0	Adequate review; need more comparison- 3	Extensive review; clear comparison of existing solutions - 6
<i>Technical Knowledge (Application Workflow, Tools, Protocols)</i> (15 Marks)	No clarity on architecture or tools- 0	Basic understanding; workflows partially correct– 8 marks	Strong end-to-end understanding (hardware/software, sensing, communication, UI, protocols)- 15
<i>Report</i> (5 Marks)	Very generic; unclear problem or approach– 0	Adequate but lacks clear justification- 3	Well-written problem, use case, and plan- 5

Case 3: Software Based**Guide Review 1: Software based [20 Marks]**

Component	Rubrics		
<i>Originality of the Work</i> (4 Marks)	Existing template or system directly reused without meaningful Customization-0	Extends an existing idea with new or improved features-3	Novel framing of a problem or significantly enhanced system with original components-4
<i>Motivation (User Survey / Problem Relevance)</i> (6 Marks)	Requirements unclear, incomplete, or lacking justification 0	Adequate requirements but insufficient depth or justification for Feasibility-3	Comprehensive functional and non-functional requirements with justified scope-6
<i>Domain Knowledge & Understanding of Technology</i> (8 Marks)	Little to no understanding of backend, frontend, or database components-0	Understands fundamentals but lacks clarity in how components interact – 4	Clear understanding of chosen stack, architecture, and component interactions - 8
<i>Meeting Regularity & Involvement</i> (2 Marks)	Is not regular in meeting – 0	Meets regularly but inactive in discussions – 1	Meets regularly and active in discussions - 2

Panel Review 1: Software based [30 marks]

Component	Rubrics		
<i>Originality of Use Case</i> (4 Marks)	Direct reuse of existing system or idea; no customization- 0	Improved or extended version of an existing system - 3	Novel concept, well-justified need, and original solution approach - 4
<i>Literature Review & Benchmarking</i> (6 Marks)	Requirements vague; unclear scope; unrealistic deliverables-0	Clear requirements but feasibility planning incomplete - 3	Well-defined requirements with realistic scope and feasibility justification - 6
<i>Technical Knowledge (Application Workflow, Tools, Protocols)</i> (15 Marks)	Architecture unclear; APIs, data flow, UI flow, and DB design not Articulated-0	Architecture defined but lacking detail in components (API flow, DB schema, module mapping) - 8	Comprehensive architecture including DB schema, API endpoints, UI flow, module mapping, and deployment considerations-15
<i>Report</i> (5 Marks)	Very generic; requirements unclear; no structure-0	Basic SRS but lacking clarity or proper formatting- 3	Well-structured, clear 1-page SRS with relevant diagrams- 5
